

Archer Electrical

CASE STUDY/RETAIL/ 068 NOV 2017

CLIENT: JACK WILLS
 LOCATION: Beverley
 DESCRIPTION: Full Electrical Installation
 DATE: November 2017

Working together with B batch Group Archer Electrical undertook the full electrical installation for Jack Wills new store located in a Grade II listed building, enhancing Beverley’s unspoilt 13th century skyline.

Jack Wills enjoy a large dose of British heritage and this building reflects that too, taking over what was once Beverley’s oldest shop - a hardware and electrical store called Briggs & Powell Ltd. that had been trading since 1896 – inheriting an amazing piece of history that was put to good use in the electrical design.

Jack Wills stores have opened across the United Kingdom and internationally. There are currently approx. 70 stores in the UK

We completed the electrical installation on programme for the Beverley stores opening in mid-November 2017, just in time for Christmas shopping!

Testimonial:
 What the client said:

“This was our first project undertaken with Archer Electrical and we were pleased with their overall electrical installation, we will certainly be looking to use them again in the future.”
