

Archer Electrical

CASE STUDY/RETAIL/ 008 DEC 2012

CLIENT: LK BENNETT
 LOCATION: Marylebone
 DESCRIPTION: Full Electrical Installation
 DATE: December 2012

More recently LK Bennett have been rolling out their new concept design stores and Marylebone was yet another electrical installation completed for LK Bennett by Archer Electrical. The LK Bennett stores are finished to a very high standard with one of the main aspects being its impressive Italian designed retail lighting. This Marylebone store was completed in December in time for Christmas trading

Linda Kristin Bennett set up her first shop in Wimbledon village with a goal to produce “something in-between” the designers you might find in Bond Street and those on the high street with an emphasis on comfort and glamour. Since the creation of the original store, L.K.Bennett has expanded into an international chain of shops (including in-store concession and outlet stores in Harvey Nichols, Selfridges and Fenwick), with 109 stores in operation in the UK, Jersey, Ireland and France.

Testimonial:
 What the client said:

“May we take this opportunity to thank you and your team for the excellent effort you have all made on the recent project for L K Bennett Marylebone. Jon managed your installation excellently and your lads were very helpful on site, please pass on my thanks to all...we look forward to working again with you in the future.”
