

Archer Electrical

CASE STUDY/RETAIL/ 026 NOV 2010

CLIENT: McDONALDS
LOCATION: Nottingham Clumber Street
DESCRIPTION: Full Electrical Installation
DATE: November 2010

This large refurbishment project in the busy pedestrianized centre of Nottingham saw the basement, ground and first floor areas fitted out to the new McDonalds Purely Simple Scheme. Nottingham's phased programme of works ran very smoothly, enabling the Restaurant to continue to trade during the fit-out, we completed on time and attended handover without a single snag item.

Our numerous electrical installations for McDonalds involve us in a variety of High Street, Drive Thru, and McDonalds within Asda projects.

Testimonials:
What the client said:

"Just to let you know that we handed over Clumber Street yesterday to a very happy Franchisee and McDonalds Project Manager, the store opened with no snags and some minor variations. I would personally like to thank every single one of you for the efforts put in to this very demanding project, the time put in by all prior to the job and once on site made all the hard work and planning pay off. I do hope with the forward thinking took on this project that it continues into a very busy 2011 with McDonalds. Again thank you all for a great job and please pass my thanks on to the lads that were on site"

John Cheliotis - Barlow Group Ltd

And of our Installation at Canterbury.....:

" Adrian, I just wanted to thank you and more particularly your electricians at Canterbury for their exceptional helpfulness, particularly last Saturday morning. You and your team have indeed been the shining stars of otherwise frustrating projects"

Mark McFarland - Senior Project Manager
McDonald's Restaurants
