

Archer Electrical

CASE STUDY/RETAIL/ 006 MARCH 2012

CLIENT: MONSOON
 LOCATION: Oxford Street, London
 DESCRIPTION: Full Electrical Installation
 DATE: March 2012

Having completed the electrical installations for Monsoon and Monsoon Accessorize stores in Wandsworth and Farnham last year we were delighted to be appointed for their new concept store on Oxford Street, London. This re-fit involved a complicated dual phase refurbishment programme that saw the store trading (except for the last 4 days) through the whole 7 weeks. Both basement and ground floors of this 10000SqFt unit were refurbished to the new Monsoon design concept.

Monsoon Accessorize is a design-led retailer based in London operating two international retail clothing chains - Monsoon and Accessorize. Today there are over 400 Monsoon and Accessorize stores throughout the UK. The International side now has over 900 outlets in 60+ countries
